

Nutri-Stim Triacontanol™

Triacontanol is a naturally occurring plant growth promoter which can act as a photosynthesis enhancer.

Triacontanol increases cell division rates leading to production of larger root and shoot mass. When sprayed on plants during growth periods, it activates secondary messengers leading to enhanced enzymatic activities in plants that increase the brix level in fruit.

BENEFITS

- Influences mineral uptake from soil.
- Increases permeability to water and solutions and enhances capacity to retain moisture.
- Supports the actions of natural enzymes and hormones in the plant.
- Increases the rate of photosynthesis.
- Enhances synthesis of proteins.
- Promotes flower buds.
- Promotes more tillering and branching.
- Reduces leaf drop, flower and fruit drop.
- Increases crop height.
- Increases root mass and length.
- Promotes earlier maturity.

PACKAGING:

100 mL, 1 L, 5 L,
20 L

Product Code:
NSTRIA

**LIQUID
FERTILISERS**

Nutri-Stim Triaccontanol™

APPLICATION RATES

Foliar Spray:

Vegetables

8 mL per 100 L water
Apply weekly or as required

Orchards, Vineyards, Ornamentals & Turf

8 mL per 100 L water
Apply every 2 – 4 weeks or as required

Broadacre Crops

30 mL/ha in 100 L water
Apply once or twice prior to flowering

Pasture

30 mL/ha in 100 L water
Apply as required

Spot-Spraying

8 mL per 100 L water
Apply as required

Hydroponics:

4 mL per 1000 L of final nutrient solution. Do not mix with hydroponic nutrient concentrates. Add via Part C or to the return tank.

STORAGE & HANDLING

- Store in a cool dry area out of direct sunlight. This product has been tested to store safely down to 5°C. Crystallisation or sedimentation may occur below 5°C. Do not pre-mix or store in diluted form.

TYPICAL ANALYSIS W/W

Triaccontanol.....	2.5%
SG.....	1.0
pH.....	8 – 9
Conductivity.....	0.6 – 0.8 mS/cm
Appearance.....	Milky, viscous liquid

INSTRUCTIONS

Shake or stir well before use. Where higher water rates are required for good foliar coverage, do not exceed maximum product rate per hectare. Sensitive foliage or plants should be test sprayed prior to full scale application. Frequencies are a guideline only and can be adjusted according to farm practices and/or in conjunction with crop monitoring. Ensure suitable spray conditions (e.g. temperature, humidity, wind-speed), prior to foliar application. Compatibility and/or performance cannot be guaranteed when combined with other products. Jar test for compatibility and spray test on small area before wide-spread use.

IMPORTANT

- Not compatible with solutions containing a high concentration of soluble phosphorus or potassium. Jar test for compatibility.
- **Note:** Product in 1000 L tanks may weigh over 1 tonne. Forklift with 2 tonne lifting capacity is recommended.

Disclaimer: Any recommendations provided by Nutri-Tech Solutions Pty Ltd (NTS) or its Distributors are advice only. As no control can be exercised over storage, handling, mixing application or use, or weather, plant or soil conditions before, during or after application (all of which may affect the performance of our program), no responsibility for, or liability for any failure in performance, losses, damages, or injuries (consequential or otherwise), arising from such storage, mixing, application, or use will be accepted under any circumstances whatsoever. NTS recommend you contact an Agronomist prior to product application. The Buyer assumes all responsibility for the use of any NTS products.
