

TrueStim™

Photosynthesis stimulator

A blend of photo-boosting of calcium, magnesium and boron used on all crops to boost photosynthesis for increased plant production.

Features and benefits

TrueStim contains a balanced blend of nutrients that promote plant production through photosynthesis. Photosynthesis produces plant sugars which are the building blocks for advanced compounds in plants that help boost immunity and enable critical plant functions such as reproduction.

TrueStim contains calcium which is responsible for the uptake and translocation of all minerals and governs cell strength and cell division. TrueStim also contains magnesium, which is the life blood of chlorophyll and a phosphate synergist.

It also contains Boron which is critical for reproduction and is a calcium synergist.

Application rates and guidelines

Apply 3-4 L per acre at V2 on corn, at V3 and V6 on soybeans. For forages such as alfalfa, apply 6 L/acre, 7 days after each cutting. For vegetables, apply 3 L per acre every other week in alternation with TrueBlend Foliar.

Guaranteed analysis

Total Nitrogen (N)	0.17%
Soluble Potash (K ₂ O)	0.46%
Calcium (Ca)	6.35%
Magnesium (Mg)	0.84%
Boron (B)	298 ppm
Zinc (Zn)	35 ppm

NET CONTENTS: 100 L 1000 L ____ L

Safety, storage and handling

Store in a cool dry area out of direct sunlight. May cause skin irritation with prolonged exposure. May be harmful if swallowed. Avoid contact with eyes, skin, open cuts or sores. Wash hands after use.

Apply this product along with other liquid nutrients, biostimulants and growth enhancers, directly onto the soil. Apply only when diluted with water. Pure solutions can be stored and will remain stable for extended periods of time, depending on the environment in which they are stored. Use all that you dilute. Do not store diluted material for more than 12 hours.

TrueStim is compatible with most fertilizers not containing phosphorus. However, compatibility and/or performance cannot be guaranteed when combined with other products. A jar compatibility test is always recommended to ensure an effective and usable mix.

This label is believed to be reliable and should be followed carefully. Injury to the treated crop may result from the occurrence of extraordinary or unusual weather conditions or the failure to follow the label directions or good application practices, all of which are beyond the control of Agriculture Solutions, Inc. or seller. Failure to follow label directions may cause injury to crops, animals, man or the environment. The Company warrants that this product conforms to the chemical description on the label and is reasonably fit for the referred purpose, subject to the factors noted above. The Company makes no other warranties or representations of any kind concerning the product, including no implied warranty of merchantability or fitness for any particular purpose, and no such warranty shall be implied by law. The exclusive remedy against the Company for any cause of action relating to the handling or use of this product shall be limited to, at Agriculture Solutions' election, either a refund of the purchase price paid by buyer or user for product bought, or a replacement of the product used. To the extent allowed by law, the Company shall not be liable and any and all claims against the Company are waived for special, indirect, incidental, or consequential damages or expense of any nature, including, but not limited to, loss of profits or income. The Company and the seller offer this product and the buyer and user accept it, subject to the foregoing conditions of sale and limitation of warranty, liability and remedies.
